

Arduino IDE Installation Process

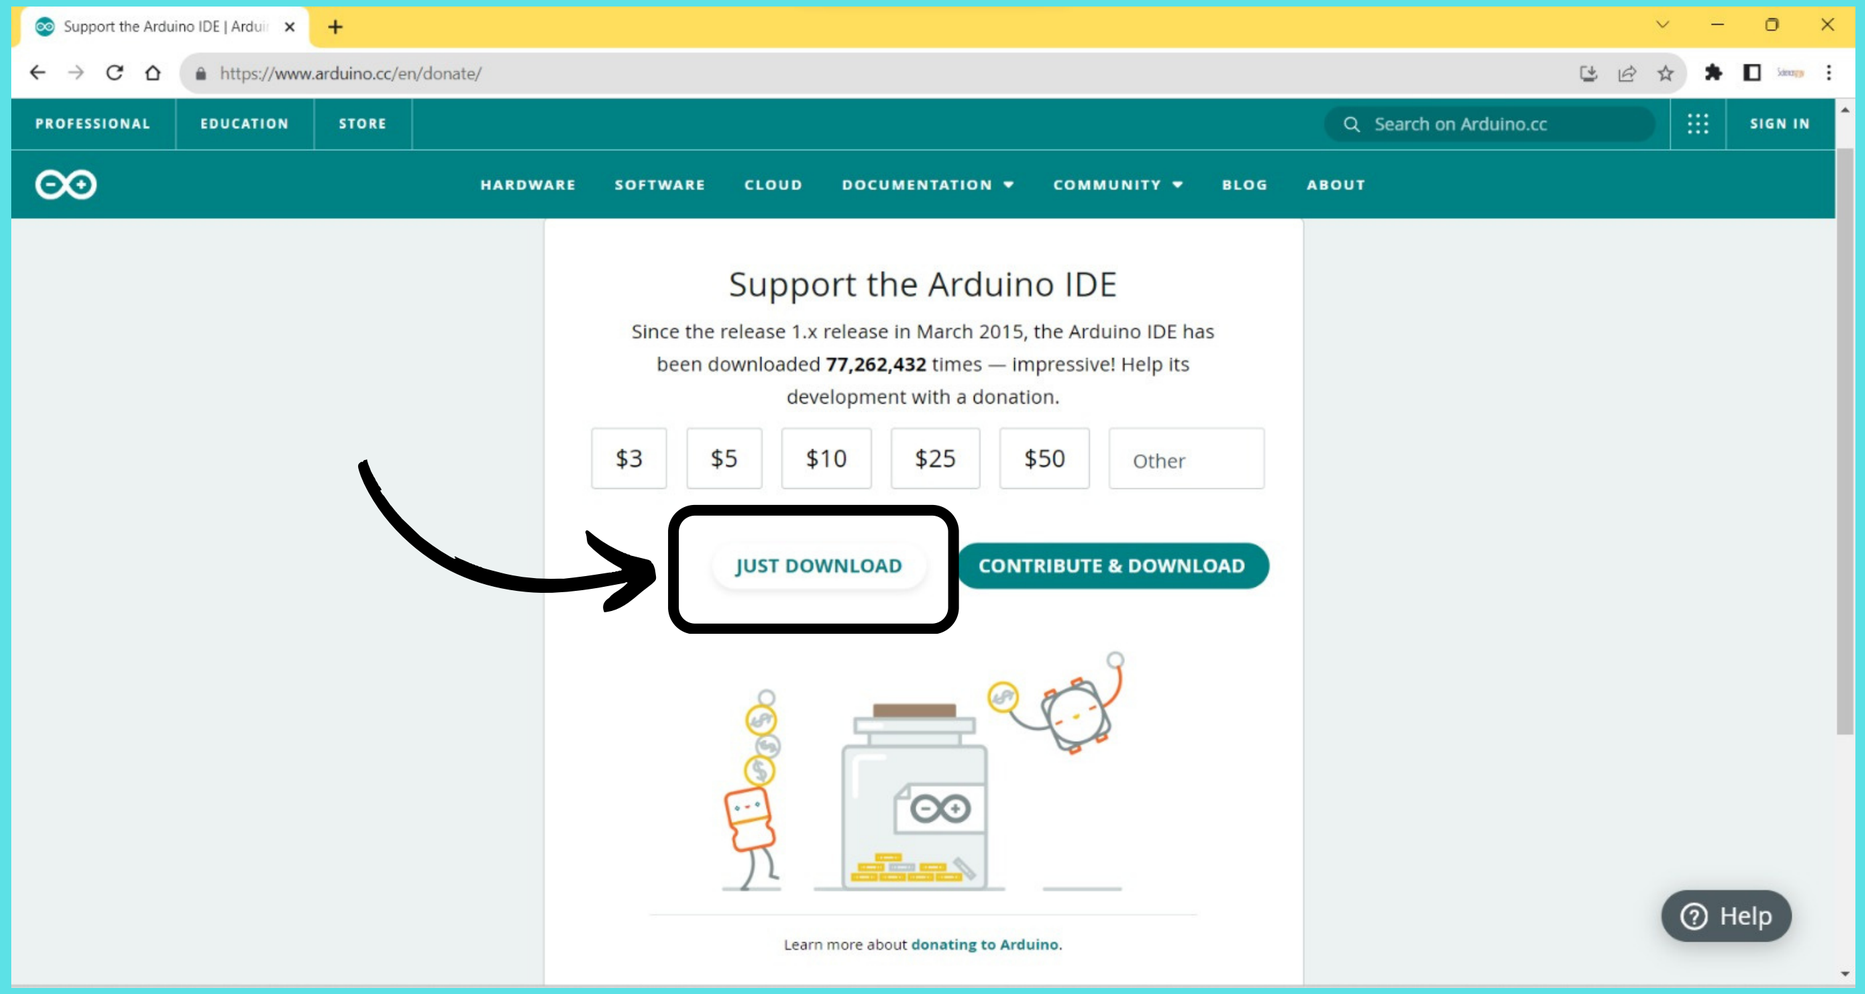

Step 1: Open browser and search for Arduino IDE Download and open the first result.

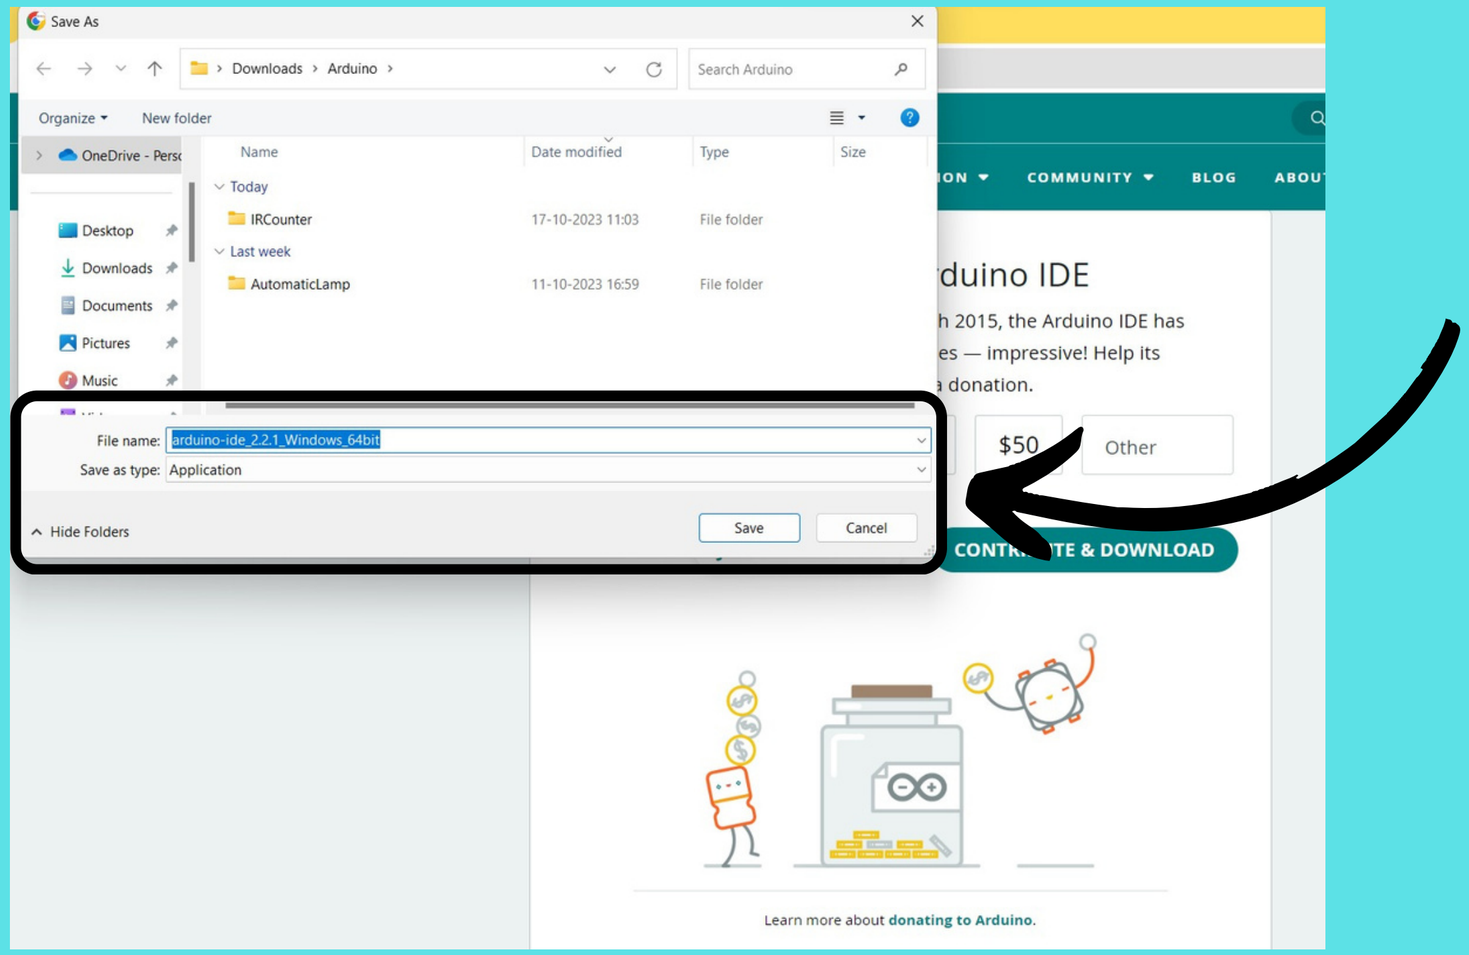

Step 2: Choose the operating system that is installed on your computer from **Download options.**

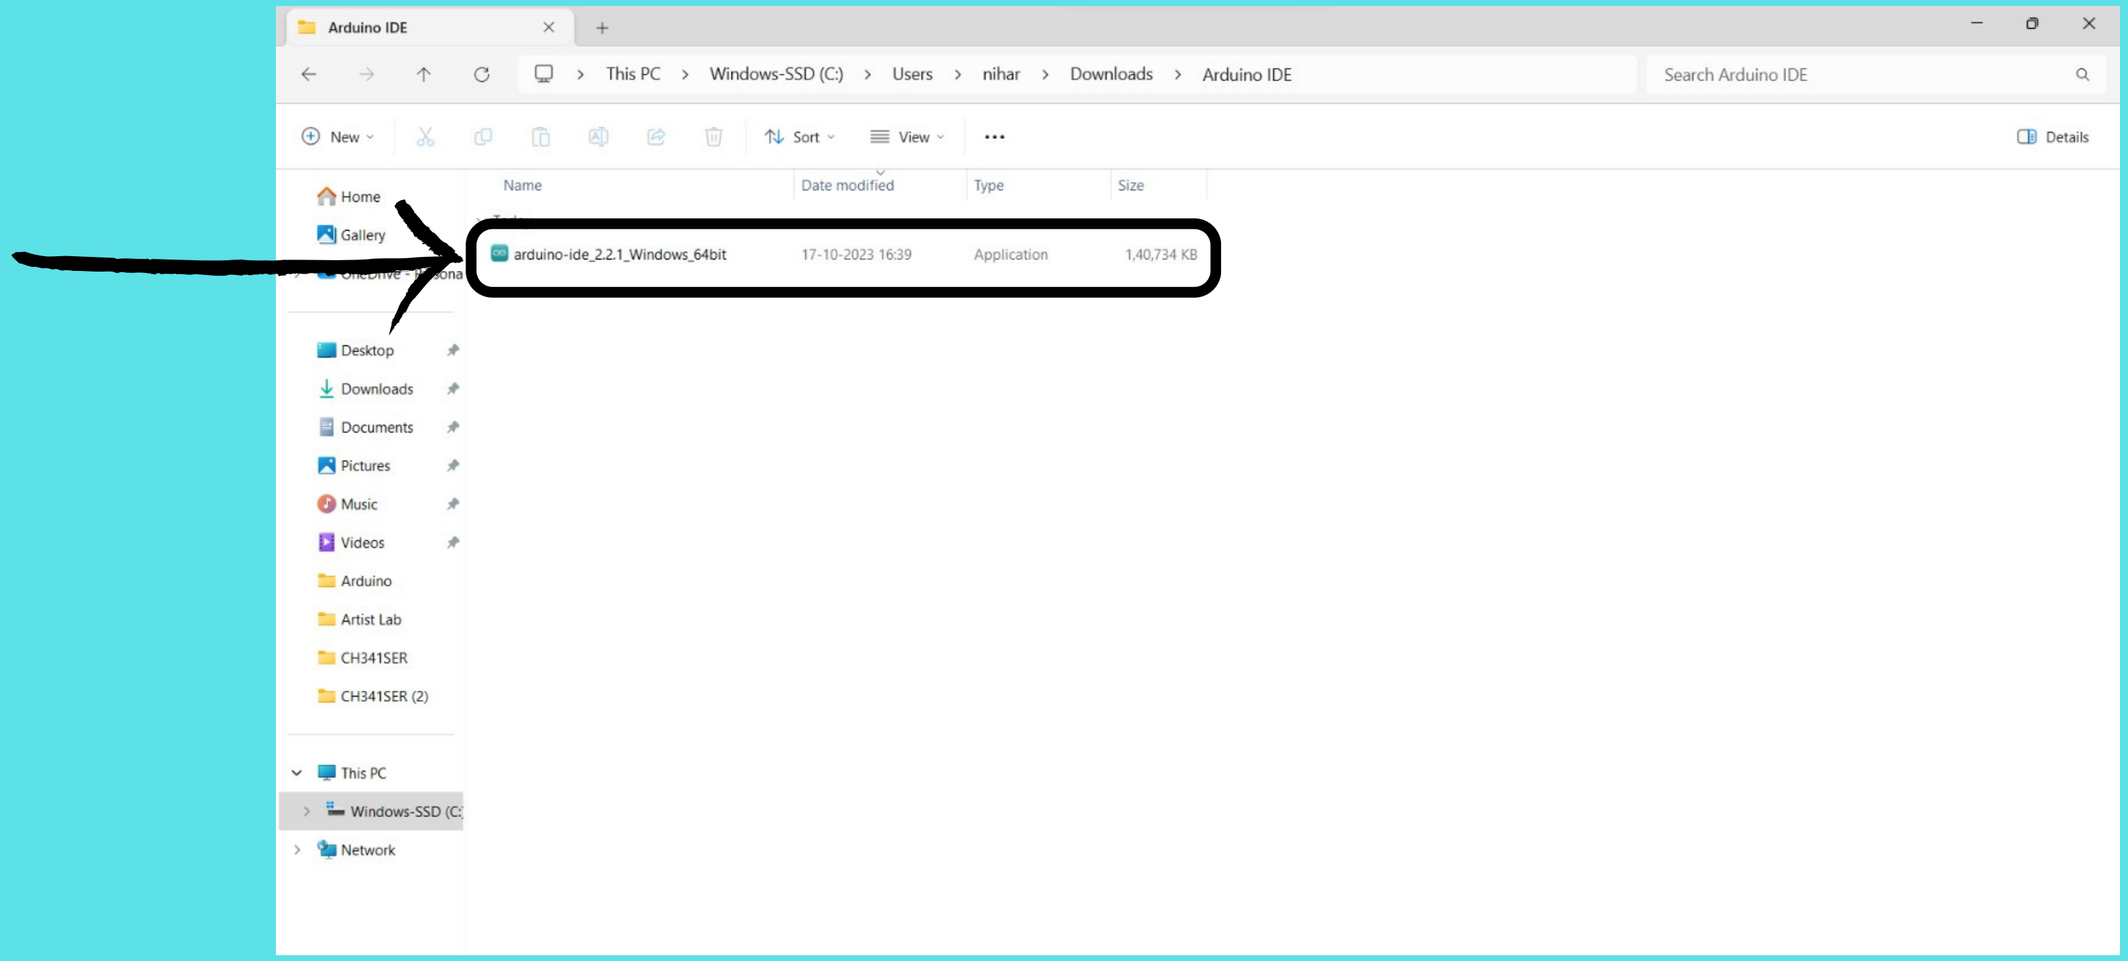

Step 3: Select **just download** option.

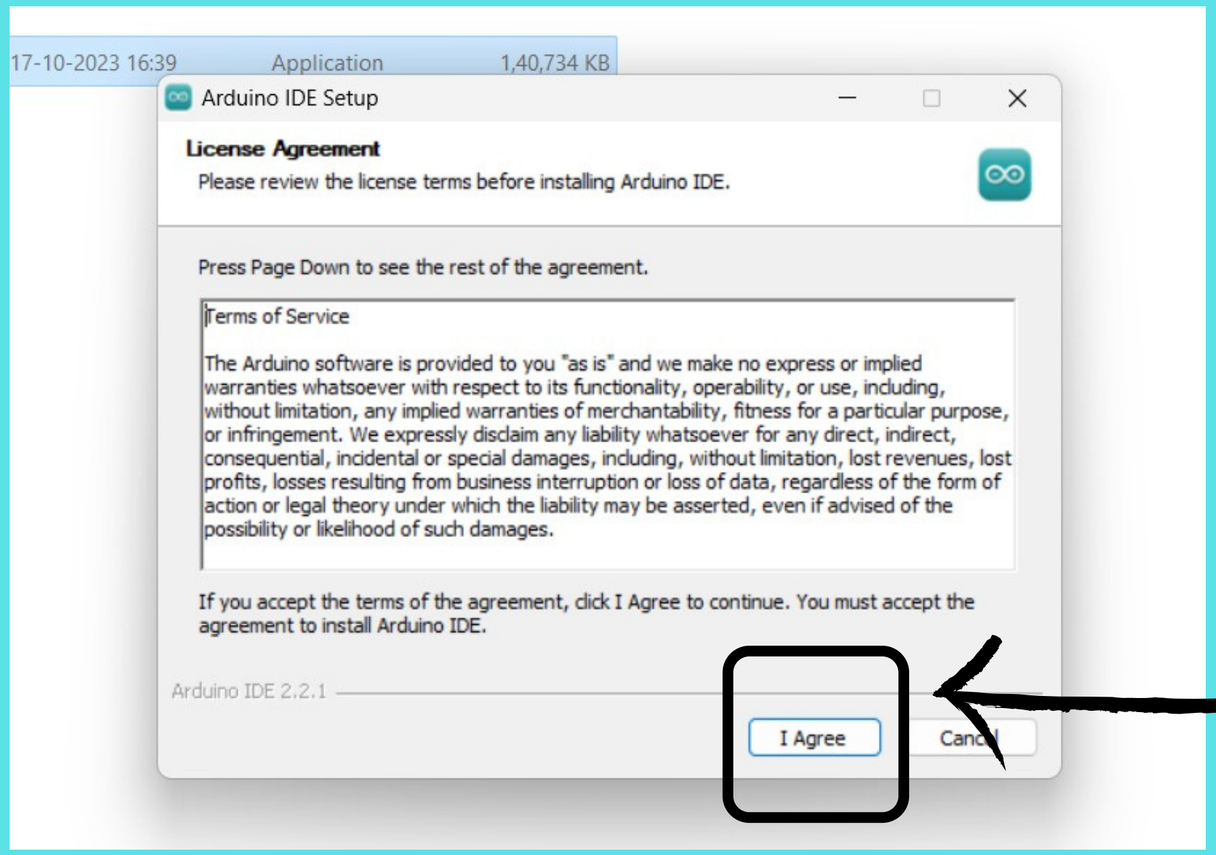

Step 4: Select the file location where you want to download and Click on **Save**.

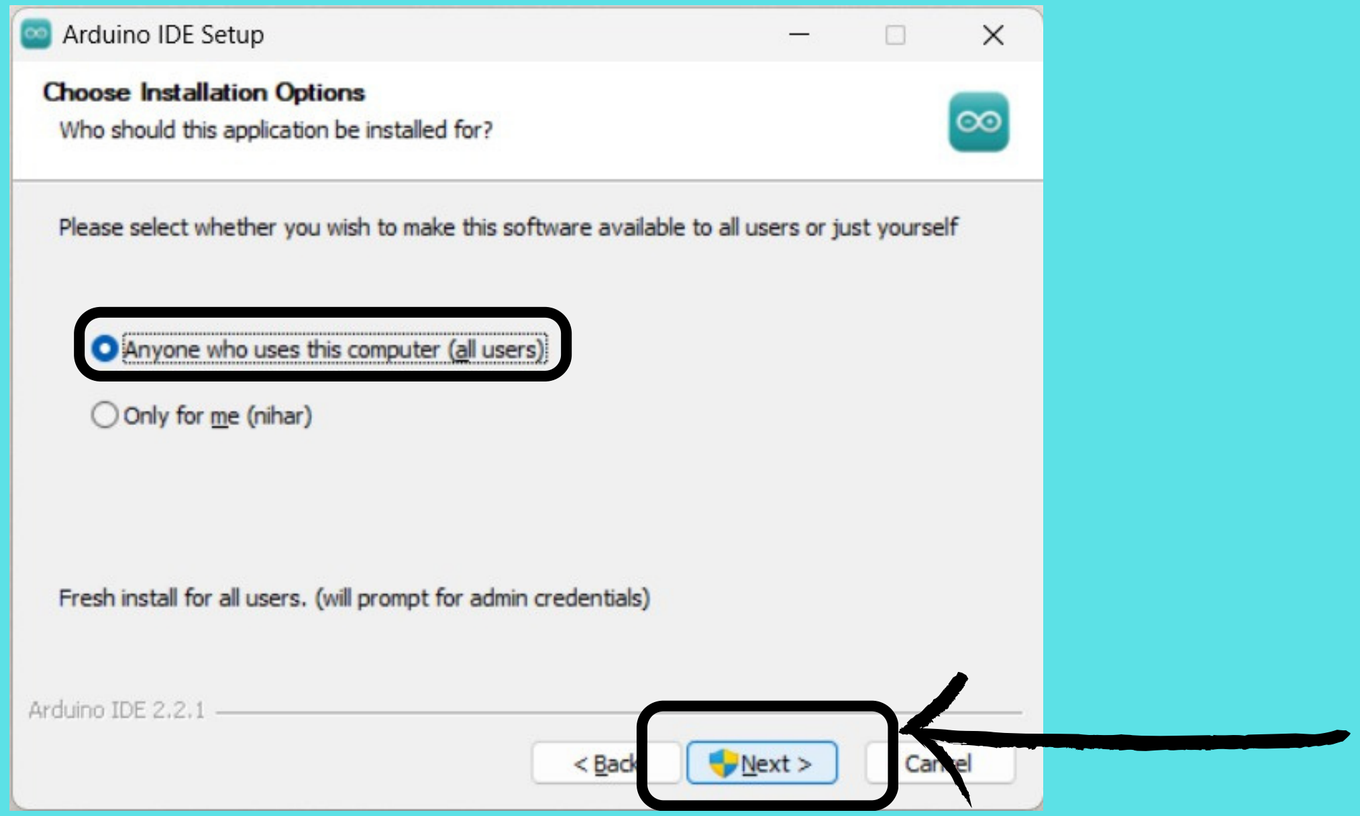

Step 5: Go to the file location of the downloaded file and double click on the file.

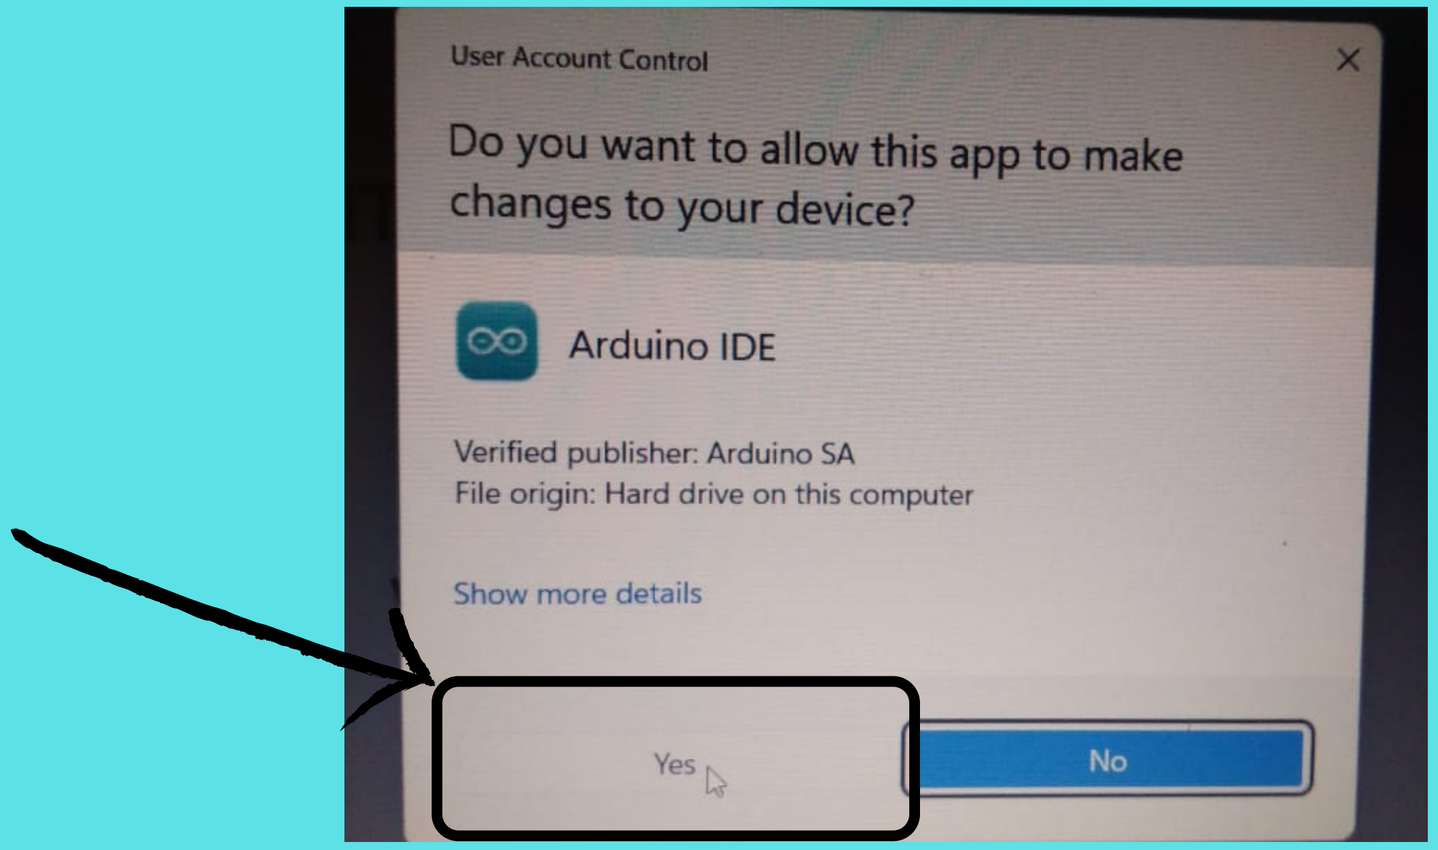

Step 6: Select **I Agree** option.

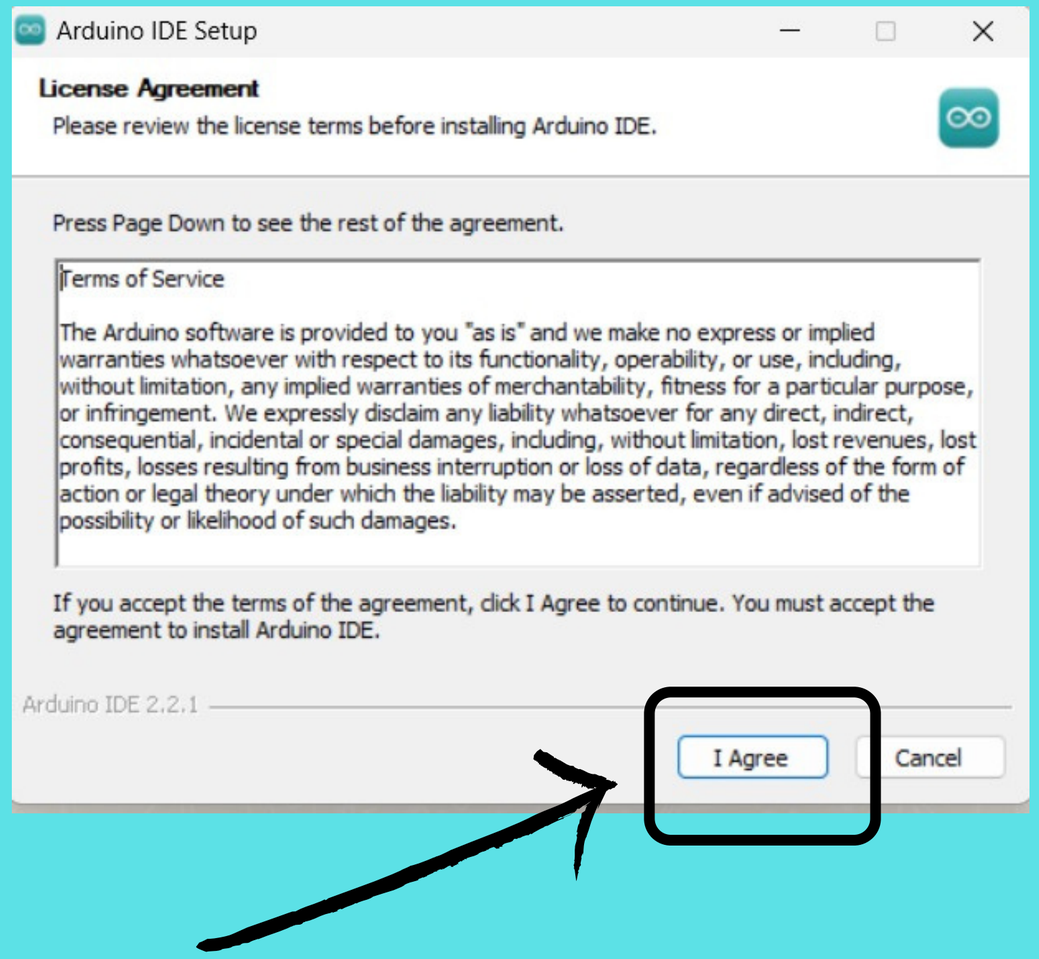

Step 7: Select first option **(Anyone who uses this computer)** and click on **Next**.

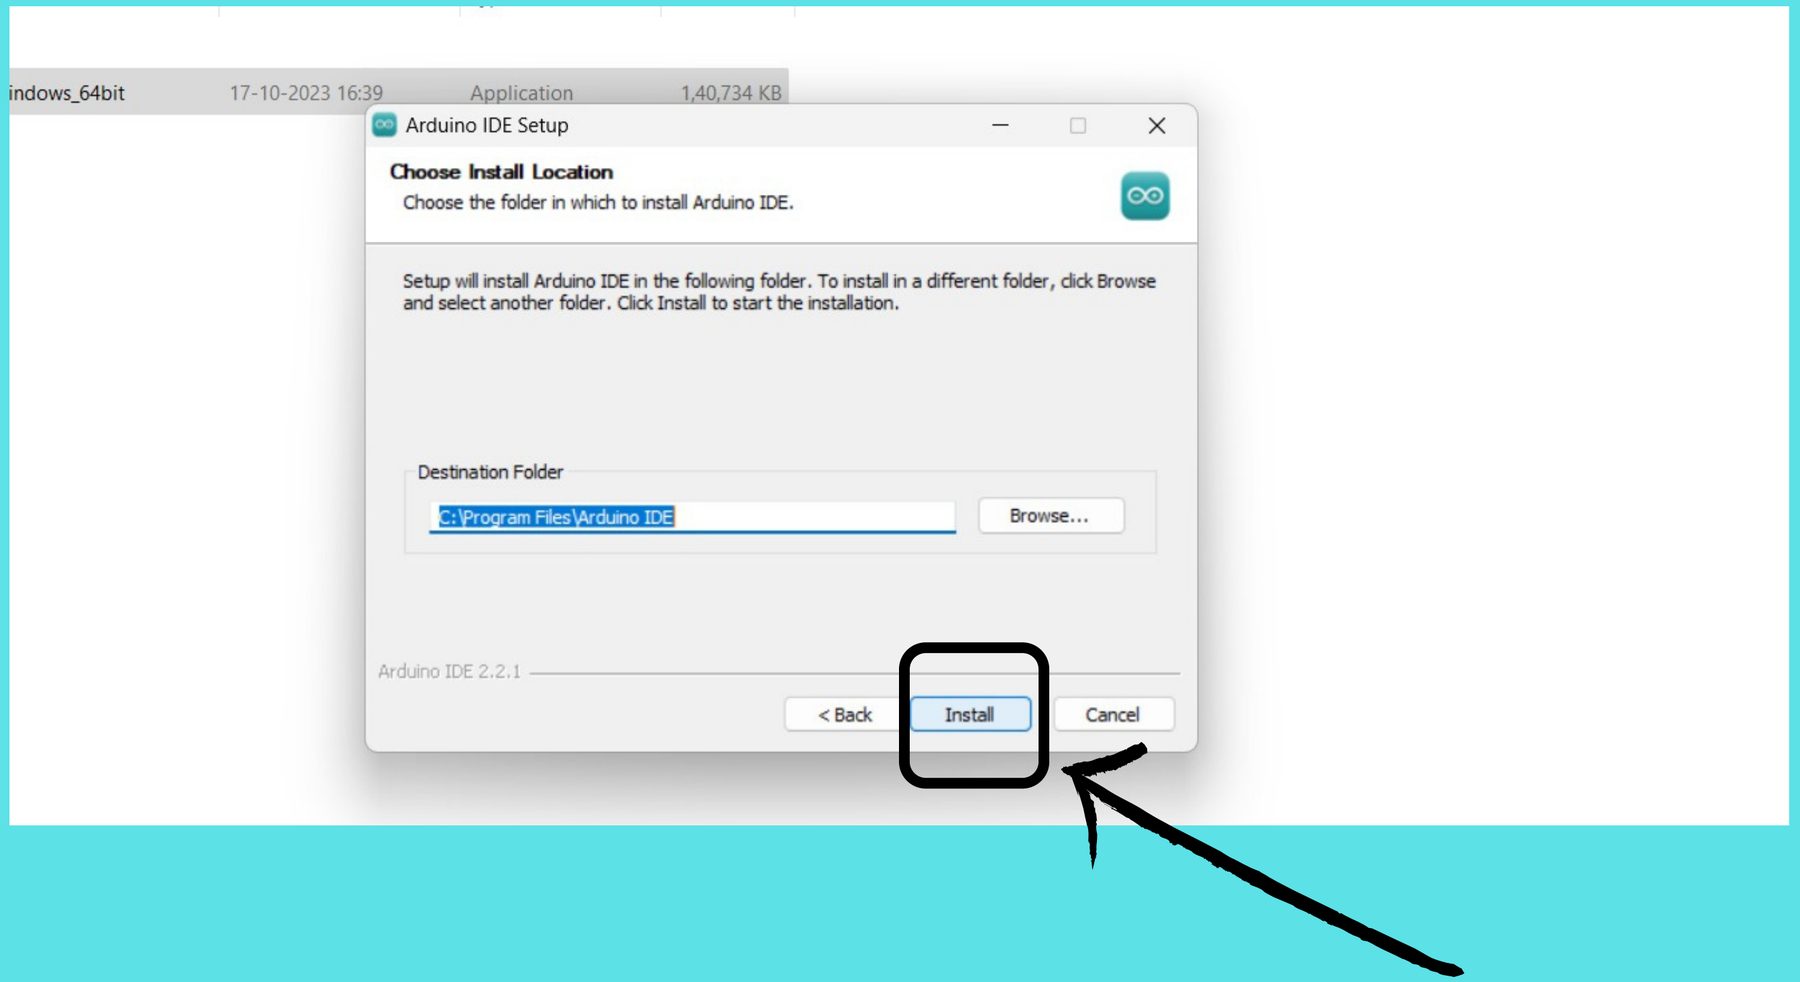

Step 8: Click on **Yes.**

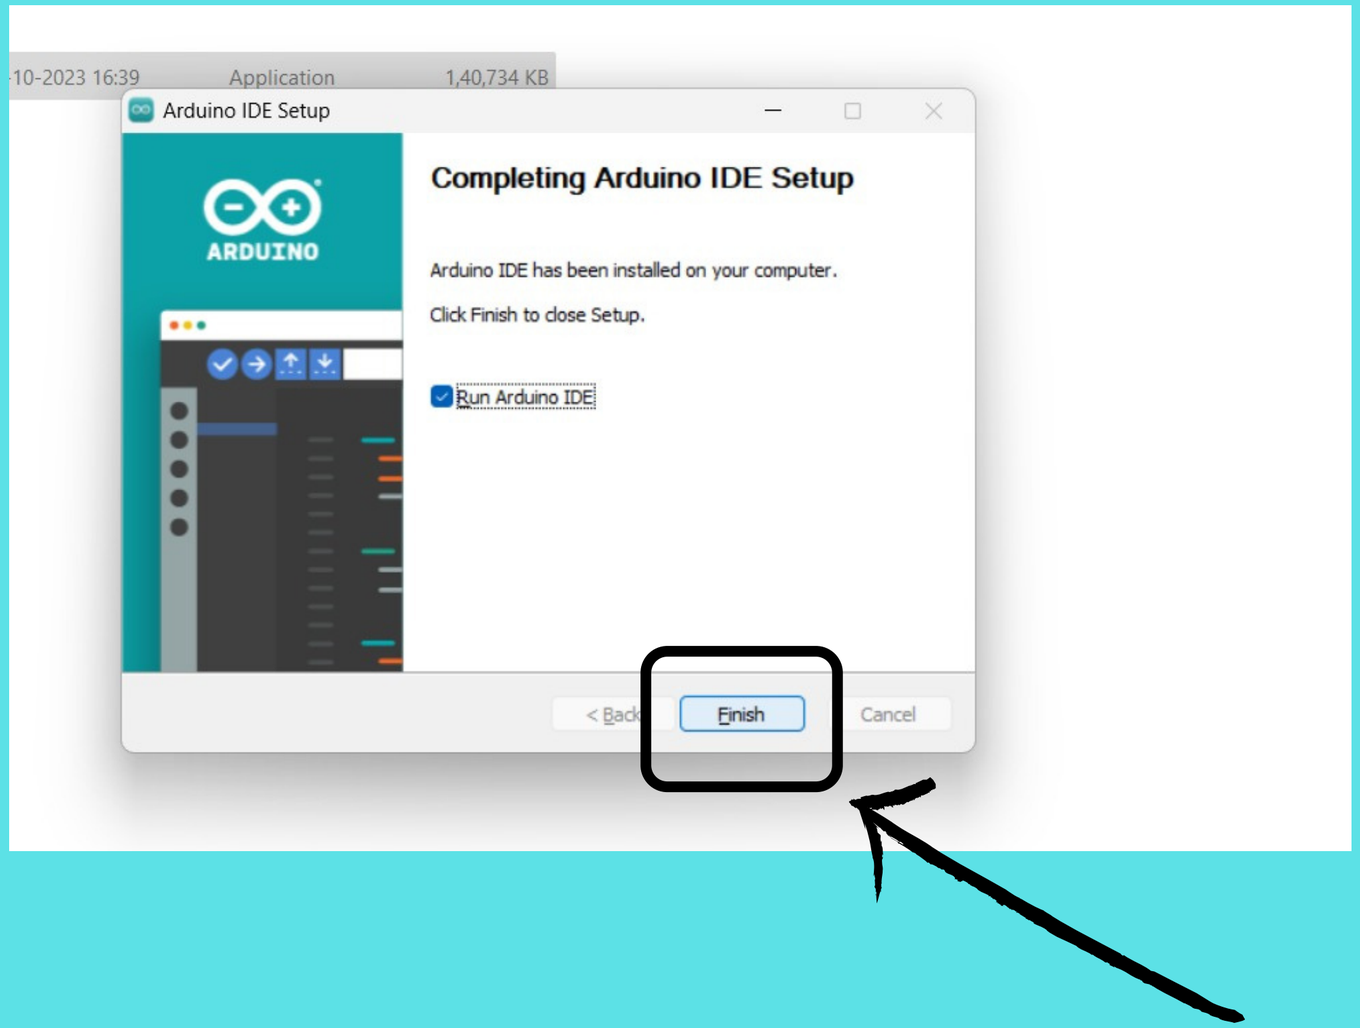

Step 9: Click on **I Agree.**

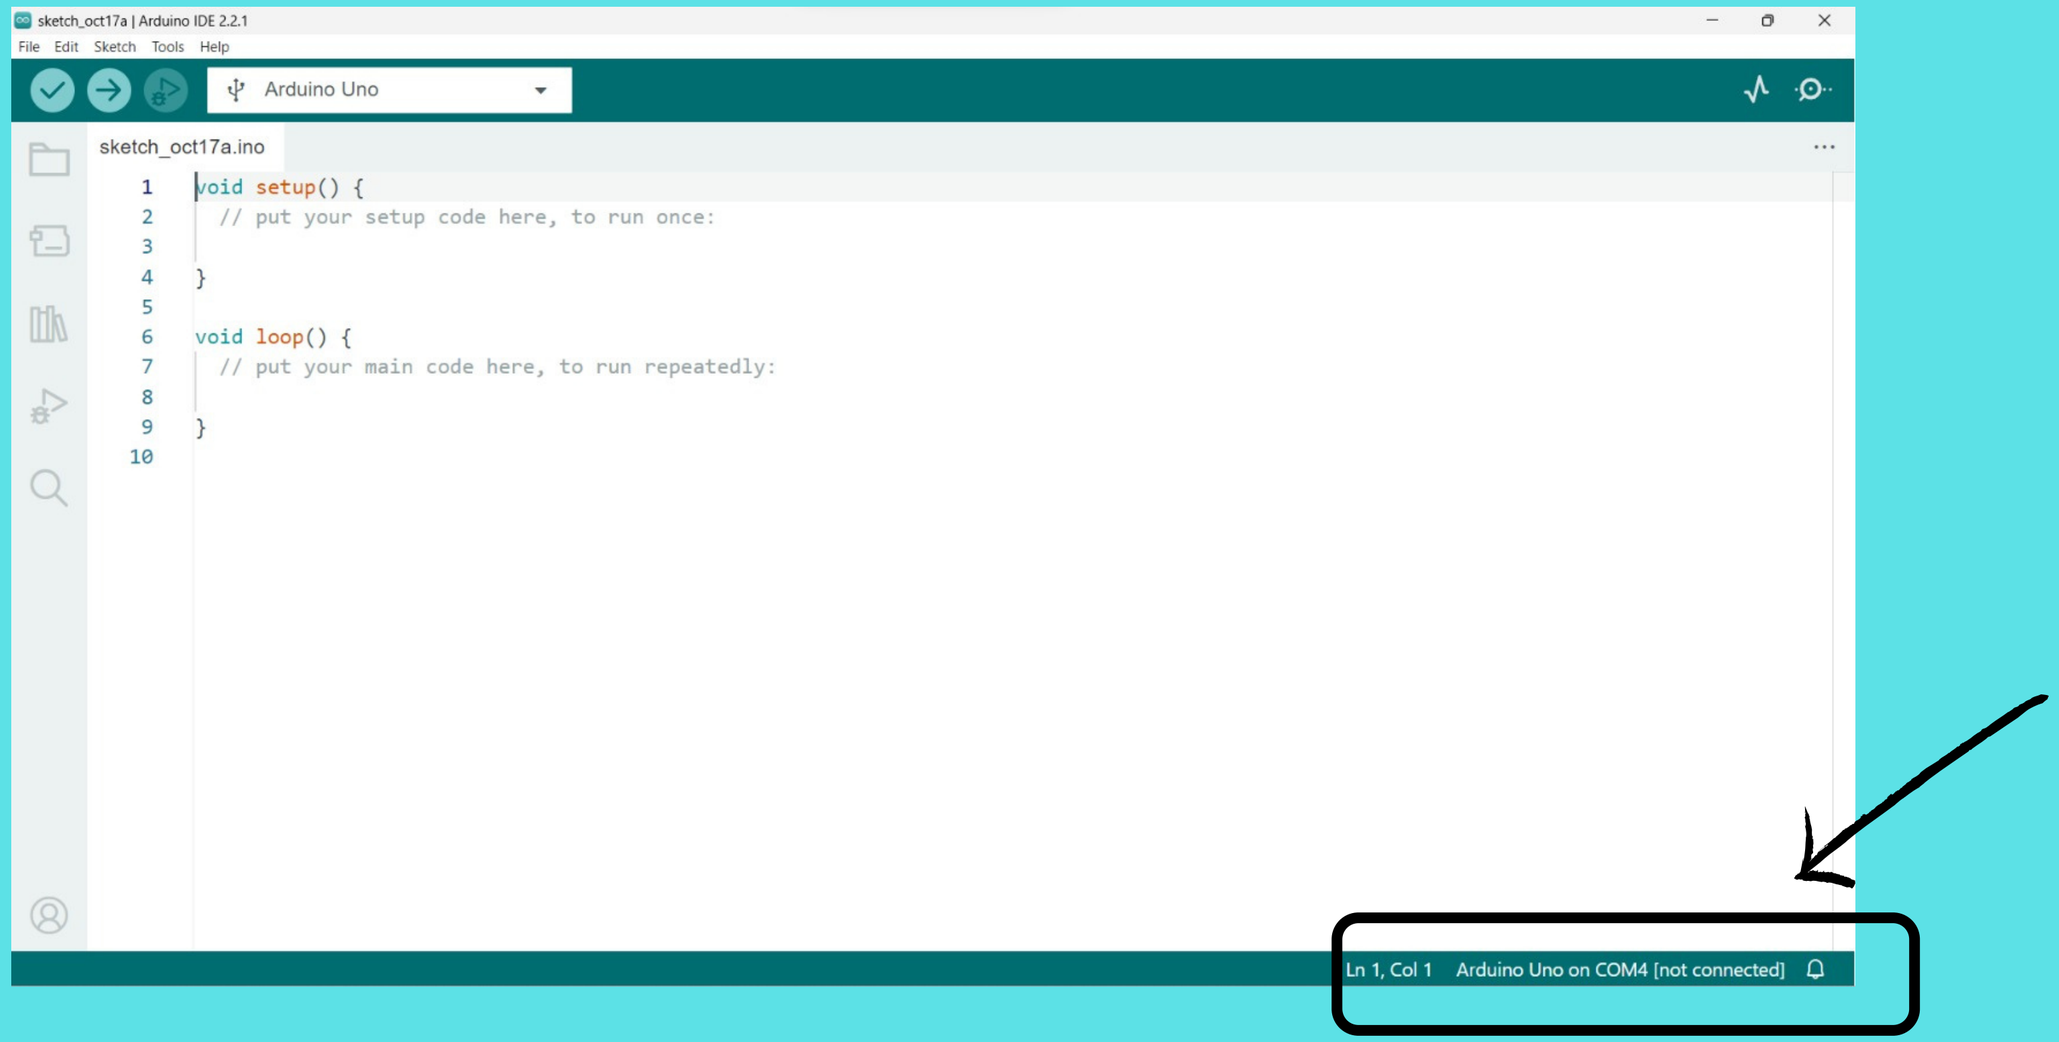

Step 10: Click on **Install**.

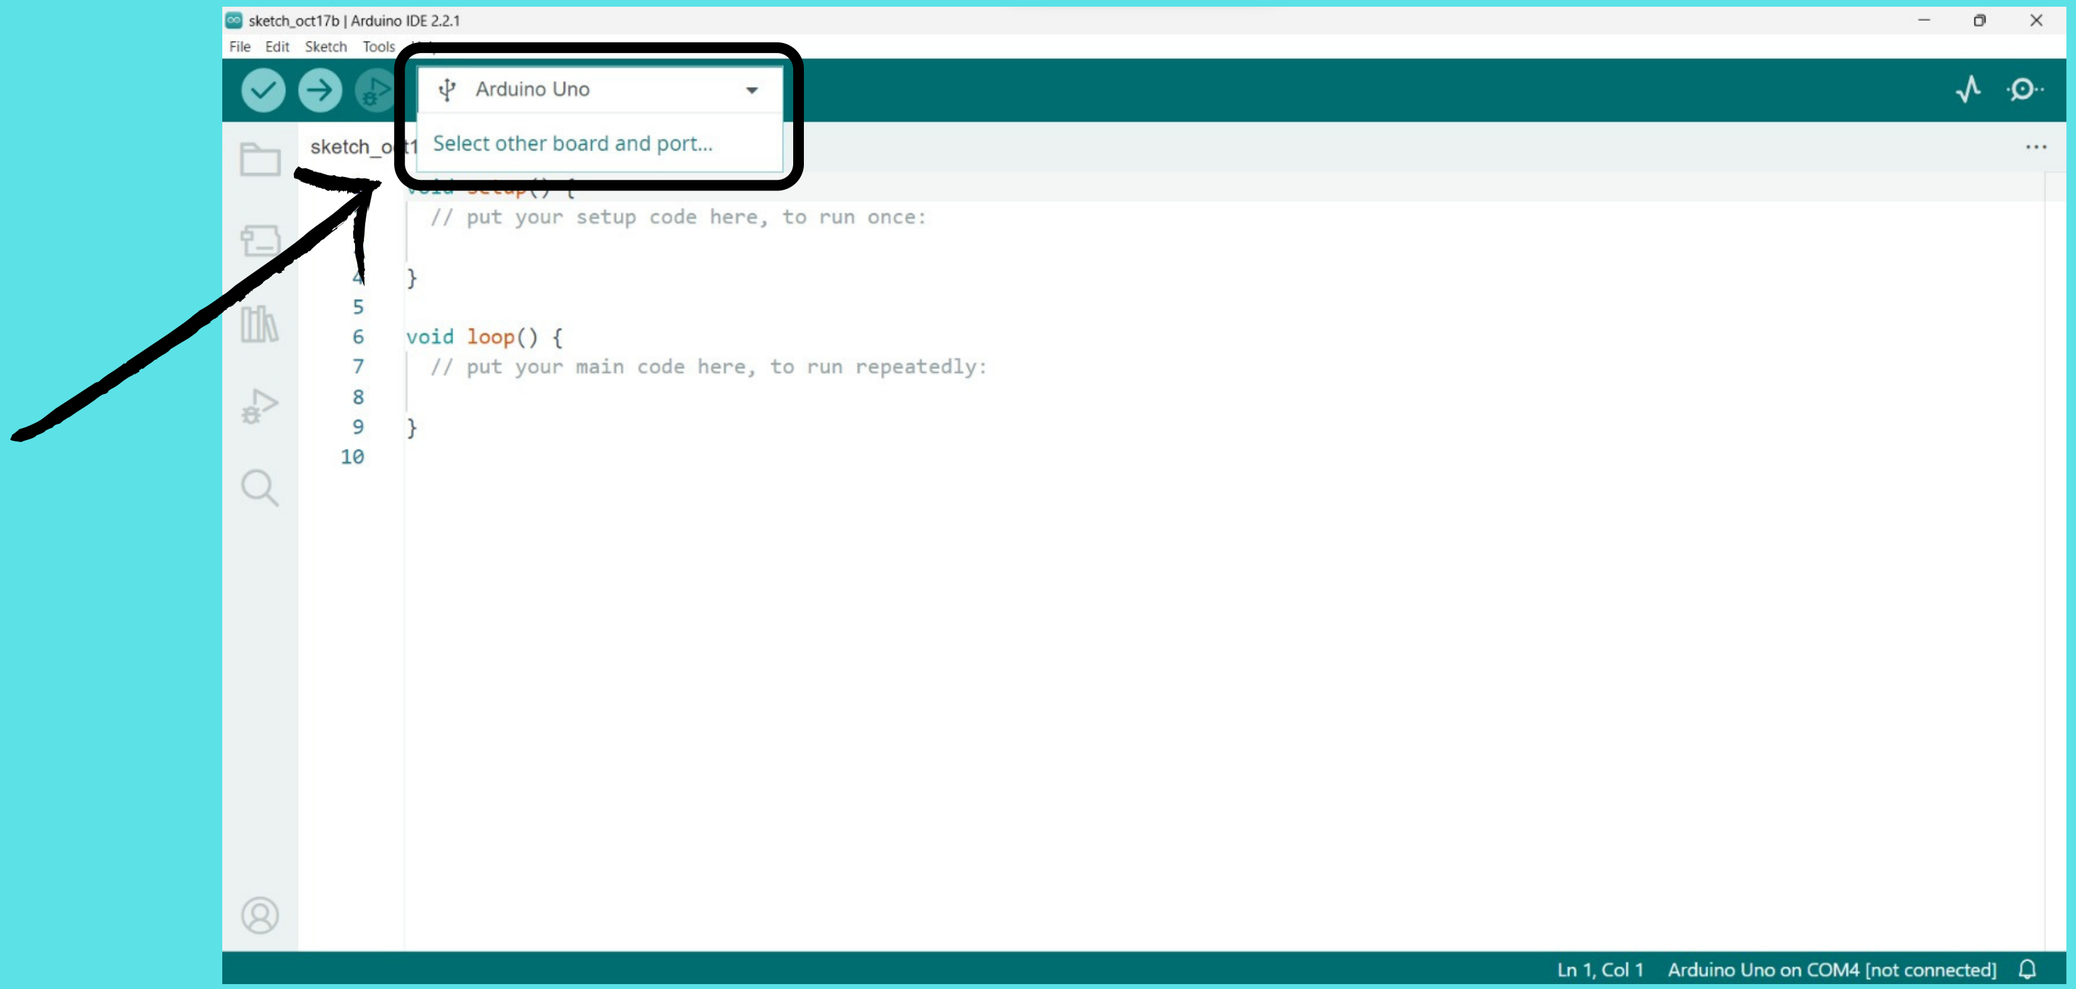

Step 11: Click on **Finish**.

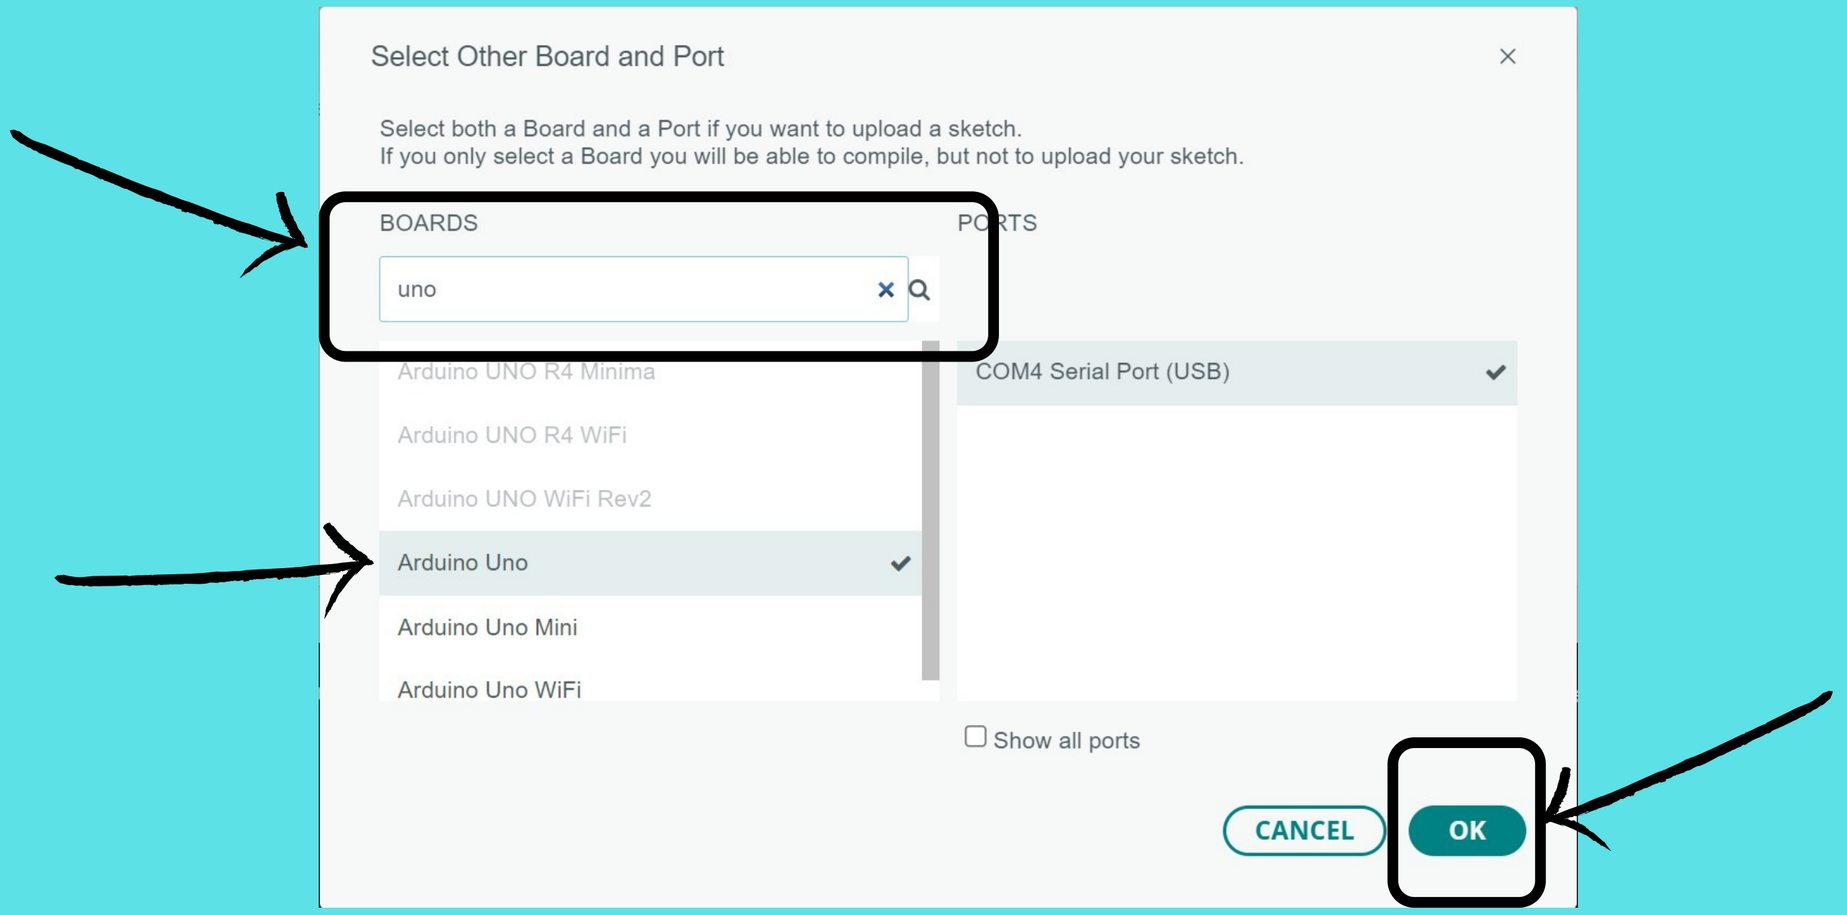

Step 12: Arduino IDE gets started. Now connect the **Arduino UNO** to your computer using the USB cable. Initially it is shown as not connected.

Step 13: Now click on **select other board and port..**

Step 14: Now select for **UNO** in the search bar and select **Arduino UNO**. Click on **OK**.

Step 15: Once you complete code click on the upload button. If it has no errors you will get compilation message at bottom right corner.
